

Handbuch Der Topographischen Anatomie Und Ihrer Praktisch Medicinisch-Chirurgischen Anwendung (1)

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 80 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Management, Scientific and Technical Information Division, 1991. OCLC Number: ocm27903759 Subject: Aerodynamics. Excerpt: . . . With two series, the numerical result can be matched for P and P . The coefficients a_n , b_n and C depend on the Mach number profile in the boundary layer and can be found by substitution into Equation 18. When the series in Equations 21 and 22 are matched to the numerical result on the fuselage side of the singular point ($z = z_s$), a decision must be made--by regarding branches of the log function. This issue has been discussed extensively in the literature in conjunction with studies of boundary layer instability using the 2D incompressible version of Equation 18. The early work of Tollmien, Lin, and Wasow is summarized by Schlichting [3] where it is shown that the branch of the logarithm must be taken such that $\ln(z - z_s)$ in $z - z_s - i\omega$ for $z = z_s$. This was proved by examination of a more complete fourth order differential equation for the flow that, because it includes viscosity,...
