Excerpt: .of its strong radio-active properties they called radium. The remarkable thing about this discovery was not only that this new and remarkable substance had been found, but still more that an absolutely new method of discovery had been brought to the aid of science. If it were not for the fact that radium was capable of emitting this radiation which could be observed by electrical means even tho it was concealed in a mixture of other substances, this remarkable substance would in all probability have escaped the notice of chemists for a very long time to come for it was with very considerable labor and difficulty that it was isolated by chemical means. There was thus added to the already long list of powerful methods of scientific attack another one even more remarkable than those hitherto known. Many new and interesting properties of these...
