

Exercises in electrical magnetic measurement

Filesize: 5.5 MB

Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.

EXERCISES IN ELECTRICAL MAGNETIC MEASUREMENT

DOWNLOAD

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 edition. Excerpt: . . . the deflections 280 20 and 210 respectively. If on another occasion a current of a certain strength produce a deflection of 370 in the galvanometer A, what deflection would the same current have produced in B When a tangent galvanometer is inserted in a circuit with the plane of its coil coinciding with that of the magnetic meridian, a current of strength, c , will produce a deflection, θ , the two being connected by the equation $c = m \tan \theta$, where m is a constant whose numerical value depends upon the construction of the particular instrument and upon the intensity of the local magnetic field. Let m_1 and m_2 be the values of the constant m for the two galvanometers A and B; then from the first experiment we have $m_1 \tan \theta_1 = m_2 \tan \theta_2$. Let θ_1 be the number of degrees of deflection of A when the first current is passing through it, then we shall have (23.) The current from a battery (A) when sent through a certain tangent galvanometer produces a deflection of 18 30, while the current from another battery (B) on being sent through the same galvanometer produces a deflection of 260. Compare the strengths of the two currents. Answer. As 69: 100, nearly. (24.) A tangent galvanometer of very small resistance was included in a circuit consisting of a series of 12 cells and a wire resistance...
