

Mortal Crimes: The Greatest Theft in History - The Soviet Penetration of the Manhattan Project

By Nigel West

ENIGMA BOOKS, United States, 2007. Paperback. Book Condition: New. Revised, Expanded. 230 x 156 mm. Language: English . Brand New Book. development of the atomic bomb *Written by renowned, prize-winning author Nigel West *The full story of Soviet espionage related for the first time West s book makes an important contribution to espionage studies - Publishers Weekly In September 1945 Igor Gouzenko, a cipher clerk based at Ottawa s Soviet embassy, traded a batch of purloined files in return for a secure future for himself, his pregnant wife and children. His defection led to the slow unravelling of Soviet efforts to steal American atomic secrets, which eventually led to the arrest of Dr Allan Nunn May, a Cambridge-educated physicist who confessed to having passed atomic secrets to a Russian contact in Canada in 1944. Critically acclaimed author Nigel West has been given unprecedented access to files in the British and US archives relating to the Soviet espionage apparatus. His research reveals exactly how the USSR was able to steal and use the technological secrets. Their success led to the building of the Soviet atomic bomb. The identities of Dr Nunn May s colleagues on the Manhattan Project who collaborated with the...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
